

FAISAL KHAN

Frontend & Full-Stack Engineer

Ranchi, India | +91-6204001240 | faisalkhantech1123@gmail.com
linkedin.com/in/khanfaisal23 | github.com/khanfaisal23 | faisalkhan.dev

TECHNICAL SKILLS

Frontend: React.js, Next.js, React Native, TypeScript, JavaScript (ES6+), Redux, Zustand, React Query, Tailwind CSS, Material UI (MUI), HTML5, CSS3, SSR, SSG, Responsive Design

Backend: Node.js, Express.js, tRPC, GraphQL, REST APIs, SQL, PostgreSQL, MongoDB, Prisma, JWT, OAuth, Backend-for-Frontend (BFF) Architecture, RBAC

AI & Data: LLM Integration (OpenAI, Groq), RAG, Prompt Engineering, Apache Kafka, Apache Druid, Apache Superset, Contentful CMS

Testing, Tooling and DevOps: Jest, React Testing Library (RTL), Vitest, Lighthouse, Web Vitals, Webpack, Vite, Docker, Git, GitHub, CI/CD

Concepts: Performance Optimization, Code Splitting, Lazy Loading, Caching, WCAG Accessibility, SCORM, Agile, Scrum, SOLID, Clean Code

PROFESSIONAL EXPERIENCE

Full-Stack Engineer | LumegaLabs (Client: Sinch) – Campaign Analytics Platform *Sep 2025 – Present*

- Built real-time analytics dashboards on React.js, Next.js, and Apache Superset for Sinch's customer communication platform across WhatsApp, SMS, RCS, and Email channels.
- Integrated Apache Kafka and Apache Druid pipelines processing large-scale event data in real time, enabling sub-second dashboard refresh rates.
- Designed reusable charting components and standardized dashboard architecture, significantly cutting new dashboard delivery time across the team.

Frontend Engineer | Code Sentinels (Client: Netflix) – Discovery Hub *Apr 2024 – Aug 2025*

- Engineered a global storyteller training platform for Netflix scaling to thousands of users across multiple regions and languages.
- Architected a Backend-for-Frontend (BFF) layer using tRPC, GraphQL, Node.js, and Express.js, decoupling client requirements from CMS schema and eliminating over-fetching platform-wide.
- Repurposed Contentful CMS as a full LMS using the SCORM standard, and implemented multilingual search and course pages following the Netflix Hawkins design system with WCAG accessibility.

Frontend Engineer | Kapstan – Cloud Infrastructure Platform *Jun 2023 – Mar 2024*

- Built cross-browser UI components for a cloud infrastructure dashboard used by DevOps teams to manage deployments and services in production.
- Maintained high test coverage with Jest and React Testing Library, reducing production bugs and enabling fast, confident iteration cycles.
- Optimized data fetching with React Query (caching, background sync, pagination) and translated Figma designs into pixel-accurate React and Tailwind CSS interfaces, reducing designer-engineer revision cycles by 40%.

PROJECTS

Lumen – AI Company Research Platform | Next.js, TypeScript, Prisma, PostgreSQL, Groq/OpenAI | Live: [lumen-nine-olive.vercel.app](#)

- Built an AI research platform that generates source-grounded company reports (RAG): the server fetches and reads real web pages, then an LLM writes a structured overview where every claim is tied to a source, with displayed confidence levels.
- Implemented follow-up Q&A grounded in the same sources, multi-provider LLM support (Groq/OpenAI), shareable report links, live metrics with AI insights, and multi-tenant workspaces with JWT auth and role-based access.

Inventory Management System – Full-Stack Operations Platform | React, TypeScript, Node.js, Express, PostgreSQL, Prisma | Live: [inventory-management-frontend-psi.vercel.app](#)

- Built a full-stack inventory platform with product, category, and supplier management plus a complete stock-movement ledger (IN/OUT/ADJUSTMENT) backed by atomic database transactions.
- Delivered a dashboard with asset valuation and low-stock alerts, JWT authentication with Admin/Staff role-based access, and a typed REST API with Zod validation, rate limiting, and Dockerized deployment.

ACHIEVEMENTS

- 700+ Data Structures and Algorithms (DSA) problems solved across LeetCode, GeeksforGeeks, HackerRank, Codeforces, and CodeChef.
- Rahmani 30 Scholar — selected among 60 scholars from 40,000+ applicants nationwide; one of India's most competitive merit scholarships.
- All India Rank 1, AME CET 2019 national engineering entrance examination.

EDUCATION

Bachelor of Technology (B.Tech), Mechanical Engineering | Jamia Millia Islamia, New Delhi

Aug 2019 – May 2023
